

PULSFOG K40

THE NUMBER #1 FOGGING MACHINE FOR CROP PROTECTION OR DISINFECTION

Big capacity means big advantages

One of the largest thermal spray machines of its kind is now even better. Improved safety features and its already known capacity makes the Pulsfog K40 the machine to help you get the best out of your products. With a capacity of between 60 (crop protection) and 120 (disinfection) litres per hour, large areas can be treated in a short time. Due to its enormous power, it can combine this capacity with a very fine and uniform mist that is spread over a length of 120 metres. **The Pulsfog K40 can thus disinfect up to 20,000 m³ per hour or treat 3 hectares of crop per hour.** Ideal for frost protection and pest control.

The Pulsfog K40 is also suitable for disinfecting poultry houses and greenhouses. The Bio system (water-cooled) with separate fluid lines also makes it possible to spray biological agents without affecting the crop protection agent.

Pulsfog K40 is being produced by Veugen Technology BV under license held by Dr. Stahl & Sohn GmbH - Pulsfog. Depending on the options on your fogger, your product may look different from the image.

FOGGING & HYGIENE

PULSFOG K40

THE NUMBER #1 FOGGING MACHINE FOR CROP PROTECTION OR DISINFECTION

Specifications

- **Bio-system** for temperature sensitive crop protection
- Automatic depressurizing valve on tanks
- Made of stainless steel
- Total weight 108 kg
- 3 Litre volume combustion chamber
- 20 Litre fuel tank
- 12 volt electric start
- 6 Dosing nozzles: 4 fluid nozzles, 2 cooling nozzles
- 3 carburetors

Capacity

60-120 litres/hour.

Tank size

2 tanks of 50 litres Standard. This can be upgraded to 100 or 150 litres.

Air throw

120 meters.

Power

125 PK / 79200 Kcal/h.

Droplet size

25 µm.

Mobility

Mobile during fogging.
